## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 11, and 12, drawn to channel assignment, classified in class 370, subclass 329.
  - II. Claims 2, 9, and 13, drawn to using channel reservation, classified in class 370, subclass 443.
  - III. Claims 3, 4, 10,14, and 15, drawn to control of data admission to the network, classified in class 370, subclass 230.
  - IV. Claims 5-8 and 16-21, drawn to transmission power control, classified in class 455, subclass 522.

The inventions are distinct from each other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as signal transmission method wherein communication request for a high speed communication is rejected if a maximum number of high speed communications is exceeded, invention II has separate utility such as signal transmission method wherein a communication request for a high speed communication is temporarily hold, invention III has separate utility such as signal transmission method wherein a communication request for a high speed communication is accepted with a limited

Art Unit: 2663

transmission rate, and invention IV has separate utility such as signal transmission method wherein a communication request for a high speed communication is rejected if a maximum transmission power for all high speed communications is exceeded. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their difference classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Ralph Hoppin on June 14, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
